MySQL (basic)
MongoDB (basic)

 **Spoken languages:**  Italian (Native),  English (Professional)

Core experiences (2019-today)

Senior front-end consultant & teacher

[Sentiero.digital](#) – (02/2022 - **today**)

I was involved in various projects/courses, including:

- Led a 4-member team in constructing a sophisticated data dashboard;
 - Crafted several headless e-commerce using React, Next.js/Remix, TypeScript, Shopify/Woocommerce;
 - Developed a React, TypeScript, and Styled Components component library for a banking project;
 - Built a travel-oriented single-page application with Angular, TypeScript, and RxJS;
 - Customized WordPress themes and plugins, including external app integration;
 - Taught at 4 entry-level JavaScript & React bootcamps;
 - Taught in an advanced Angular course focusing on TypeScript and unit testing (Jest)
-

Co-Founder & Lead Web Developer

[The Wave Studio](#) – (01/2019 - 02/2022)

I co-founded The Wave Studio in 2019, where I held a dual role as both a product developer and the manager of the web department overseeing 10+ developers. I operate on high-impact projects, taking charge when the technical challenge demands strong execution, in-depth development knowledge, and collaboration across various roles.

My responsibilities include continuous research and development, exploring new languages, patterns, CMS, and libraries for new implementation within the company. I coordinate and manage the whole web team and multiple sub micro-teams concurrently across various projects. I provide technical support, conduct code reviews across the agency's diverse stacks, oversee team training, manage hiring budgets, and conduct technical interviews.

Tech stack: **[JavaScript, TypeScript, RxJs, Angular, Vue, React, PHP, WordPress, Node.js]**

Other experiences (2013-2019)

Senior Front-end Developer

[Motorsquare](#) – (09/2017 - 01/2019)

Developed and maintained the startup's web/desktop applications in Angular, Vue.js and Electron. **[HTML, SASS, JavaScript, TypeScript, RxJs, Angular, Vue, Electron]**

Founder & CTO

HereToday – (11/2015 - 08/2017)

Build a food review app enchanted by a NLP algorithm for understanding which are the good parts of every restaurant. **[HTML, LESS, SASS, JavaScript, Meteor.js, Angular, Ionic, Node.js, MongoDB, Azure (cloud)]**

Front-end Developer & UI Designer

[Newmediabit](#) – (01/2015 - 11/2015)

Re-designed and developed the LovePedia portal, focusing on UI improvements and complete development. **[HTML, LESS, JavaScript, jQuery, PHP]**

WordPress Developer

[Yithemes](#) – (09/2013 - 09/2014)

Developed themes and plugins for YITH and Envato, ensuring multilanguage compatibility and providing remote customer support. **[PHP, MySQL, WordPress, JavaScript]**
